1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 22-29 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Roszyk et al. Roszyk et al disclose a method of transferring power on an in the water electrically operated device from a battery 21 that is both fully water sealed and, in use, fully electrically insulated to a water and electrically sealed electric circuit in the device using non-electrical contact coupling means. With respect to the dependent claims 23-29, these claims have been given limited weight because they are apparatus claims which do not provide method steps to further limit the method claim 22.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. McEachern shows E shaped members (Figure 3F). Kitabayashi et al show a fixed and variable power source. Ganse et al show a battery charger.
